## UNITED STATES

29 JUL 2010

THIS CHART CONTAINS OFF-ROUTE OBSTRUCTION CL

The off route obstruction clearance altitudes shown in quadrangles bounded by ticked lines of latitude and longitude are represented in THOUSANDS and HUNDREDS of feet above mean sea level. The OROCA is based on information available concerning the highest known features in each quadrangle, including terrain and obstructions. OROCA provides obstruction clearance with a 1000 foot buffer in designated non-mountainous areas and a 2000 foot buffer in designated mountainous areas within the United States. For areas in Mexico and the Caribbean which are located outside of the U.S. ADE, OROCA provides a 1000 foot buffer. This altitude is provided for information purposes only. It does not provide for NAVJAG signal coverage, communication clearance, and would not be consistent with altitudes assigned by Air Traffic Control.
